

COVID-19 Emergency distribution

Juni 2021

Together with 6 ambulances we could distribute the following

1. PPE - 30 sets (for drivers)
2. Oxygen Cylinders with Face Masks, Nozzles, Meters and Regulators - 6
3. Disposable Surgical Masks - 50,000
4. Hand Sanitizers - 120 gallons (Each gallon 5 liters)
5. Spray bottle to put sanitizers from the gallon - 30 bottles
6. Thermal Guns - 6 (one in each ambulance)
7. Pulse Oximeters - 100 total.
8. Disposable Surgical Gloves - 6 boxes (one box in each ambulance)
9. Antigen Kits for the rapid Covid test- 600
10. VTMs for PCR test - 1,200
11. Face Shields - 20 (for the driver)
12. Partition between driver to patient area in all ambulances - this was done so the when carrying the covid-19 patient the driver don't get infected.
13. Customized Seats for the patient care person to sit and - 6 (one in each ambulance)
14. Stretchers - 6 (one in each ambulance - this is needed because if someone need to carry until the road then they will use the Stretcher.

The distribution program was a great success. It was attended by the Chief District Officer of Gorkha, Chairpersons of all 5 municipalities and rural municipalities selected under the Himalayan Ambulance project, community leaders, health workers, etc. The journalists from all national media houses (both newspapers/magazines) were there and they covered the event in their news which was in Nepali language. It was the biggest news for Gorkha and nationally as well for the day of distribution. It was a short program due to Covid and still lock down (we could get special permission from the authority to conduce the program).
