Bungkot Health Post Lab Material Distribution

On Dec 03, 2020, Sambhav Nepal distributed the medical materials to the lab of Bungkot Health Post, located in Ward No 7 of Sahid Lakhan Rural Municipality, Gorkha. The health post was established in 2031 BS (1974 AD). It provides various health services to over 7,000 people.

We decided to supply lab materials to Bungkot Health Post because they already had the lab but didn't have necessary equipment for its full operation and they had to refer to larger labs in Gorkha Bazaar or Pokhara or Kathmandu for tests. If we could equip its lab with the needed equipment, they can quickly conduct various tests and provide care to the patients without having to wait for a long time for the test results from the cities.

The funding for this project was available to us from Fight for Sight Foundation through Sambhav Nepal Switzerland. After receiving the commitment letter and submitting the proposal to Social Welfare Council, we obtained the fund in Nepal. This allowed us to start purchasing the medical supplies. Please check below for the complete list of equipment we donated to the lab. Ace the Himalaya, a trekking operator which has been helping our organization for a very long time, arranged the transportation logistics of the distribution.

On Dec 03, 2020, we delivered the lab materials to Bungkot Health Post. There was a short program in the premises of the health post attended by doctors, nurses, female community health volunteers, ward chief, local leaders, government officials, etc. They all were happy that their lab was going to operate fully and provide health services quickly and efficiently.

With our "Himalayan Ambulance" project, we are providing ambulances to all the municipalities and rural municipalities of Gorkha district. In the first phase, we have chosen 1 municipality and 4 rural municipality. Sahid Lakha Rural Municipality is also selected and the ambulance for this area will be operated by Bungkot Health Post. This will provide affordable and fully equipped ambulance services.

We are thankful to our donor Fight for Sight Foundation, Melanie Kreuzer and Sambhav Nepal Switzerland for contributing to the project and making it possible for the locals of Sahid Lakhan Rural Municipality to get better health services.

Please check the following link for the photos of the distribution program:
